Introduction

This document is a Message Implementation Guideline (MIG) for a business message used in Infor's enterprise application, M3. It defines in detail the collaboration logic between the business message and the M3 system.

The MIG supplied by Infor is based on the business functionality in M3.

The business message format is Extensible Markup Language (XML). XML is a standard developed by the World Wide Web Consortium (W3C). "Element" in this document refers to an XML element. The business message is divided into "message parts"; a message part is a logical unit within the business message, for example, a header, an address or details/lines. Within each message part each element can have up to four parents. The message part, the parents and the element define the XPath for the element. Structural levels for the message's object and process (for example "PurchaseOrder" and "Show") are only shown in the XPaths in this document.

This document consists of two major sections: Elements Used and Element Documentation. The section Elements Used provides an overall view of all elements used in this MIG. The section Element Documentation provides detailed specifications of each and every element implemented in the business message. The element information is presented in the order in which the elements are defined in the business message.

Elements Used

This section contains a summary of all elements used in this message application, that is, the elements that have documentation attached. The XPaths for these elements are provided relative to the message parts. The elements are listed in message structure order

Element Documentation

This section is based on the same structure as the section Elements Used, but here you see all the available descriptions, statuses (conditional or mandatory), repeats (0, 1, 2 etc. or unbounded), data types (alphanumeric, numeric, date etc.) and data lengths. There is a page break for every message part. Parents' attributes are only shown when the parents change. This section also includes M3 application documentation and the XPath for the element, which specifies the position of the element in the message structure.

M3 application documentation consists of three sections: M3 Application Description, M3 Application Data Translation and M3 Application Specification.

M3 Application Description

This section provides a general description in “business process language” and describes how the element is used in relation to the M3 logic, for example, which M3 data is used.

M3 Application Data Translation

This section specifies whether or not the data can be translated between M3 and the message. Data translation is used, for example, to translate unit of measure (“STK” to “PCS”) and currency codes (“PND” to “GBP”). Data translations are managed by the M3 program “Business Message Data Translation. Display” (CRS881) and the program “Business Message Data. Translate” (CRS882). The key used in (CRS881) for the element’s data translation is provided.

M3 Application Specification

This section contains the specification that constitutes the base for the business message. It describes whether the element uses data from or transfers data to a M3 API, uses calculated data and/or fixed data. It also describes how and when to make the M3 API calls, which input and output fields to use, etc. Additional information may also be given, such as conditions or notes to clarify specific logic used. Taken together, the sections M3 Application Description and M3 Application Specification define the functionality of the business message.

MessagePart		Repeat		Description
GeneralMessageHeader		M	1	General message header
Parent1	MessageIdentification	M	1	Message identification
Element	MessageObject	M		Message object
XPath: <i>PriceListReport_Show_1/GeneralMessageHeader/MessageIdentification/MessageObject</i>

API data MI program: OIS530MI Transaction: GetHeadResponse Field: ACHK

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/ACHK*

Element CALD C d 10 Calculation date

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: CALD

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/CALD*

Element STAT C a 2 Status

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: STAT

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/STAT*

Element AGNO C a 7 Blanket agreement number

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: AGNO

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/AGNO*

Element STDT C d 10 Start date

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: STDT

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/STDT*

MessagePart		Repeat	Description
Show/Header		M 1	Price list report header
Element	CUNO	C a 10	Customer number

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: CUNO

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/CUNO*

Element	ASCD	C a 6	Assortment
---------	-------------	-----------	------------

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: ASCD

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/ASCD*

Element	SOPH	C a 2	Sorting option - item number
---------	-------------	-----------	------------------------------

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: SOPH

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/SOPH*

Element	ALWT	C n 2	Alias category
---------	-------------	-----------	----------------

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: ALWT

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/ALWT*

Element	ALWQ	C a 4	Alias qualifier
---------	-------------	-----------	-----------------

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: ALWQ

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/ALWQ*

Element	WHLO	C a 3	Warehouse
---------	-------------	-----------	-----------

M3 Application Description:

M3 Application Specification:

API data MI program: OIS530MI Transaction: GetHeadResponse Field: WHLO

XPath: *PriceListReport_Show_1/PriceListReport/Show/Header/WHLO*
